

COURSE: HYDRAULIC WORKS DESIGN

TEACHER: Prof. GIUSEPPE OLIVETO

e-mail: giuseppe.oliveto@unibas.it

website:

Language: Italian/English

ECTS: 9

n. of hours: 81

Academic year: 2015/2016

Campus: Potenza, Italy

Semester: II

TOPICS

The course is concerned with lectures and a suite of practical applications on: Hydraulic structures for water-flow storage and diversion, Water-power plants, Pumping plants, River flood controls, Water distribution piping systems, Sewer systems, Earth-channel hydraulics, and Water-Structure interactions. Other activities include seminars and technical visits to major hydraulic structures and/or plants.

TEACHING METHODS (please tick one or more options)

- Theoretical lessons
- Tutorials in classroom
- Tutorials in laboratory
- Project works
- Technical visits

Other activities (please specify) _____

TEXTBOOKS

1) F. Arredi. Costruzioni Idrauliche, UTET, Torino; **(2)** G. Ippolito. Appunti di Costruzioni Idrauliche, Liguori Editore, Napoli; **(3)** V. Milano. Acquedotti, Hoepli Editore, Milano; **(4)** AA.VV. Sistemi di Fognatura – Manuale di Progettazione, Hoepli Editore, Milano; **(5)** U. Moisello. Idrologia Tecnica, La Goliardica Pavese, Pavia; **(6)** G. Evangelisti. Impianti Idroelettrici (Volumi I e II), Pàtron Editore, Bologna; **(7)** V.T. Chow, Open-Channel Hydraulics, McGraw-Hill, Singapore; **(8)** P. Novak et al., Hydraulic Structures, Taylor & Francis, Abingdon, UK; **(9)** W.H. Hager, Wastewater Hydraulics, Springer-Verlag, Berlin, Germany; **(10)** W.H. Graf, Fluvial Hydraulics: Flow and Transport Processes in Channels of Simple Geometry, John Wiley and Sons, England.

ON-LINE EDUCATIONAL MATERIAL

web address: _____

LEARNING OUTCOMES

The overall objective of this course is to familiarize students with criteria, methods, and models for design of hydraulic structures and plants.

REQUIREMENTS

Course prerequisites include: Fluid Mechanics and Hydraulic Structures I.

EVALUATION METHODS (please tick one or more options)

- Intermediate verifications
- Written examination
- Discussion of a project work
- Practical test
- Oral examination

Other methods (please specify) _____

DETAILED CONTENT

Review of hydrologic engineering methods for water resources management and flood control. **Hydraulic structures for water-flow storage and diversion:** basic hydrologic and hydraulic concepts and methods on dams and water diversions. **Water power plants:** planning and design criteria, hydraulic calculations, waterhammer analysis and control. **Pumping plants:** planning and design criteria, types of water pumps, waterhammer analysis and control. **River flood controls:** hydrologic and hydraulic fundamentals on flood lamination structures and strategies. **Water distribution piping systems:** types of water piping systems, planning and design criteria, design features, hydraulic modeling and management, valves and devices. **Sewer systems:** types of sewer systems, planning and design criteria for combined, sanitary, and storm sewers, design features, hydrologic and hydraulic modelling and management,

Università degli Studi della Basilicata
Scuola di Ingegneria

overflow devices. **Earth-channel hydraulics:** sediment transport models, hydrologic and hydraulic modeling and management. **Water-structure Interaction:** bridge hydraulics, local and contraction scour at bridges.

EXAMINATION SESSIONS (FORECAST)

20.1.2016; 18.2.2016; 18.3.2016; 20.4.2016; 20.5.2016; 21.6.2016; 26.7.2016; 20.9.2016; 20.10.2016; 18.11.2016; 20.12.2016.

SEMINARS BY EXTERNAL EXPERTS YES NO
